

attached to the transparent body fixing member 2 by the means of the holding member 305.--.

Please replace paragraph [0068] with the following paragraph:

--[0068] Fig. 11B is a schematic sectional view showing an accessory 100A' according to the third embodiment of the present invention. In the figure, the transparent body holding member 305 comprises a heat collecting member body 301 made of a good heat conductive metal such as Aluminum or Silver and an uniform fixing portion 306 made of the same metal as that of the heat collecting member body 301.--.

**In the Claims:**

Please amend claims 6 and 15 in the following manner:

6. (Once Amended) The accessory according to claim 1, wherein said holding member of said transparent body comprises a fixing portion for fixing said transparent body, a heat collecting member body connected to said fixing portion, and a leg portion for collecting heat from the battery and transmitting the heat to said heat collecting member body, wherein said fixing portion, heat collecting member body and leg portion are formed integrally.
